Dear Sirs,

This letter is in response to your letter mailed February 24, 2006. It was very difficult to reply sooner, so an extension of time form with proper fees is included.

Your letter indicates that the amendment to patent application 10/707,262 filed on October 28, 2005 is non-responsive to certain aspects of the examiner's action. This letter is specifically to address this problem.

A copy of the updated application is enclosed. It has not been modified from the October 28, 2005 version, since your letter specifically asks for responses to the original objections and explanations of how they have been fixed.

Many objections were raised over the original claims. Lack of clarity in what was being claimed due to improper phrasing and incorrect formatting according to patent law were found. The claims sections was rewritten and reformatted in response to this as well as other objections. As requested, a detailed list of answers to every rejection/objection raised in the original August 11, 2004 response is given.

Detailed action priority section # 1 – Merely gives the priority date. Does not require response.

Oath /Declaration section # 2 – Filled out and signed form is enclosed.

Specification formatting section # 3 – Objection that application was not laid out correctly. The application was updated to adhere precisely to the examiners suggested layout.
